

**BUILT FOR
PERFORMANCE**

Backpack Vacuums

A woman in athletic wear is running from left to right across the frame. She is carrying a large blue backpack vacuum cleaner. Her right arm is extended forward, and her left arm is bent at the elbow. The background is a plain, light blue color.

OUTRUN YOUR COMPETITORS

When it comes to the world's most efficient vacuum cleaners, backpack vacuums are standout performers against both canisters and uprights – creating significant productivity gains and delivering cost reductions.

3X FASTER *Backpack vacuums clean over 3 times faster than upright vacuums*

The Worldwide Cleaning Association's most recent publication of The Official ISSA 612 Cleaning Times & Tasks featured a study, revealing that backpack vacuums are over 3x more productive than uprights and almost 3x faster than canisters.

*Backpack Vacuums Clean **676m²** per hour*

*Canister Vacuums Clean **232m²** per hour*

*Upright Vacuums Clean **208m²** per hour*

OUR HIGH PERFORMANCE RANGE

Commercial Grade

2 Year Warranty (body and motor)

Low Cost Servicing

Ergonomic Harness

Lightweight

Premium Airflow

Low Noise

Premium Quality Motor

Pacvac's commercial backpack vacuum cleaners are the professional cleaning industry's number one choice for high performance products. Enhanced by our world-class ergonomic harness, our lightweight backpacks are designed to fit all body shapes providing optimal comfort. All models feature high level filtration and, when coupled with Pacvac's unique airflow systems, deliver ultimate suction performance.

Superpro battery 700

Superpro 700

Superpro micron 700

Superpro trans 700

Accessories for Each Model

2 piece chrome wand
Combination floor tool (all surfaces)
Crevice tool
Dusting brush
Upholstery tool

Additional for Battery Model

2 Batteries
(Up to 1 hour combined runtime)
1 Charger
(2 hour charge time)

Pacvac's Superpro battery 700 is an advanced battery-powered design with strong suction, delivering a superior combination of manoeuvrability, efficiency and productivity. The ergonomic configuration makes this one of the lightest and most comfortable battery backpacks on the market.

Recommended Use

Stairs, lifts, transportation vehicles (trains, planes and buses) and daytime cleaning.

The Superpro 700 encompasses the perfect balance of comfort, durability and efficiency, making this machine the number one choice for everyday commercial cleaning.

Recommended Use

Offices, retail (store outlets and supermarkets), car dealerships, stadiums, theatres, education facilities and public buildings (civic centres, museums and galleries).

The Superpro micron 700 boasts a HEPA rated high grade filter that traps 99.999% of fine dust particles. Perfect for health care operations where clean air quality is essential, its sealable disposable dust bag guarantees dust and bacteria are disposed of with minimal exposure to the user.

Recommended Use

Healthcare (hospitals, hospices, health and wellbeing centres, surgeries and general practices).

Pacvac's Superpro trans 700 is designed for use on large transportation vessels which utilise a 400 hertz power supply, such as planes, ships and trains. The lightweight and compact design makes cleaning in confined areas quick and easy.

Recommended Use

Aircraft, cruise ships, military ships and trains which utilise a 400 hertz power supply.

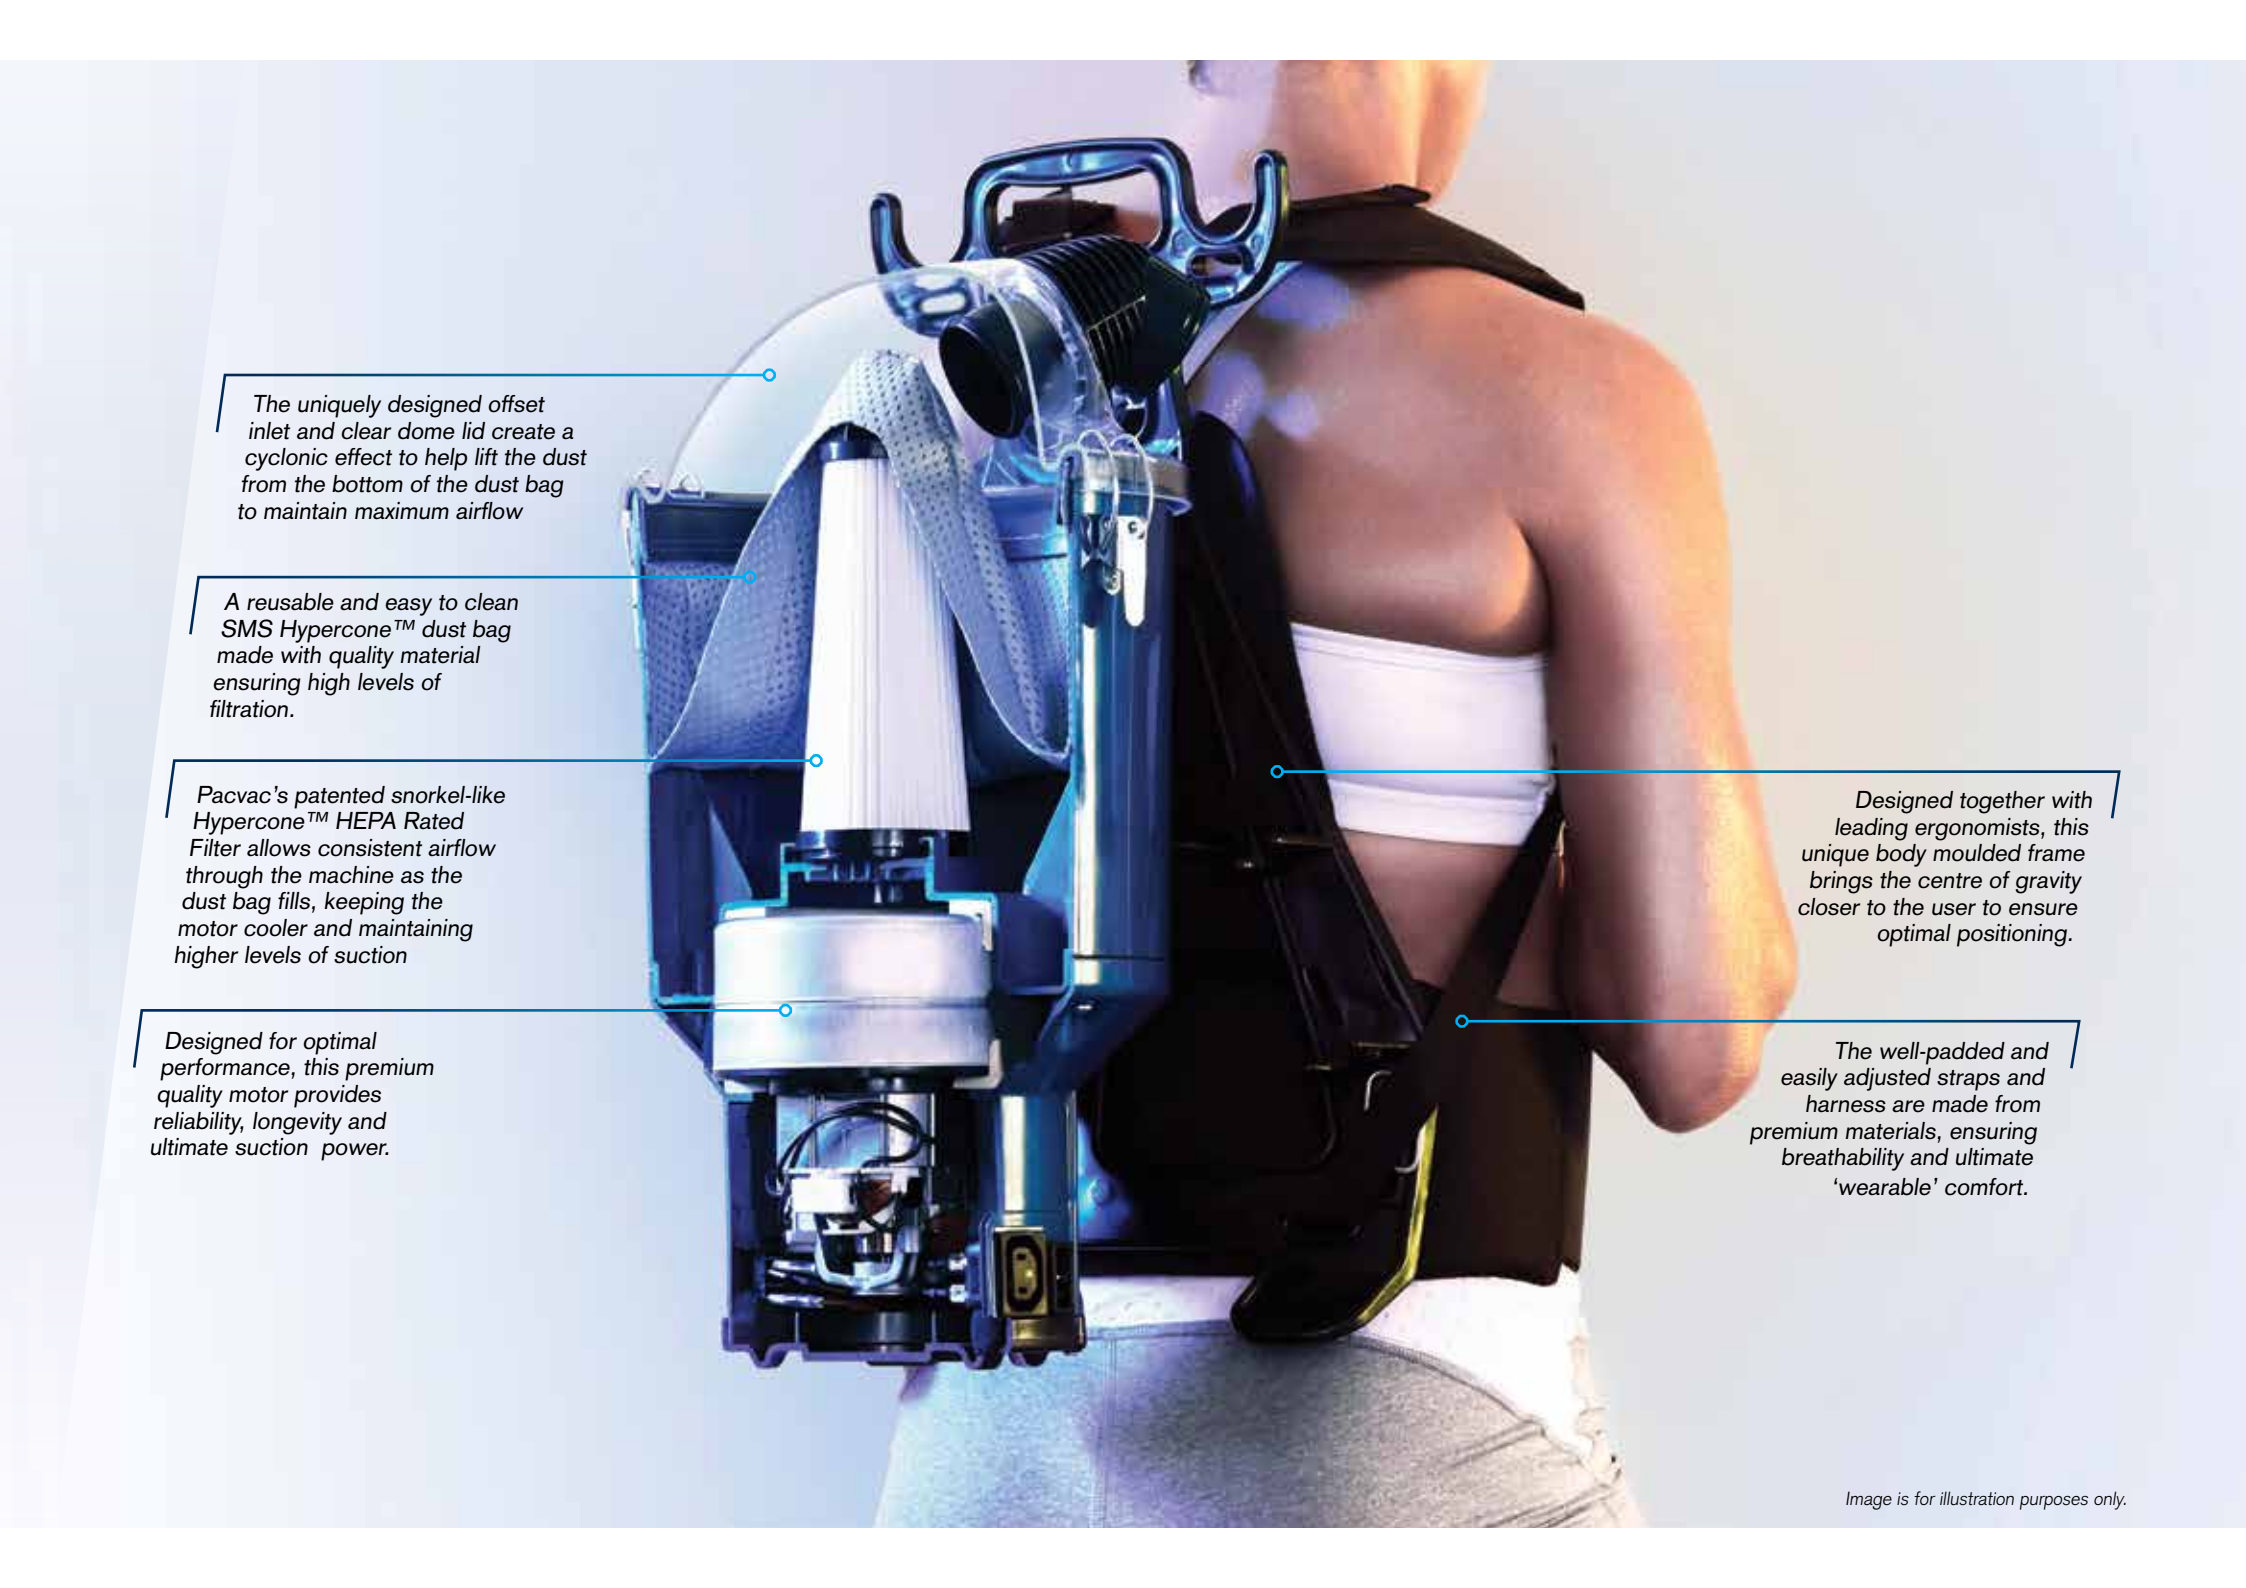

SMART DESIGN IS IN OUR DNA

Pacvac was certain of the productivity gains to be experienced by wearing a vacuum cleaner and in 1978 delivered a product which did exactly that. An innovative backpack vacuum, created from basic garage and household items, which would revolutionise the way the world understood efficient cleaning.

Today, very proudly, Pacvac is sought after as the number one brand by many of the world's most professional cleaning companies, from dedicated owner-operator businesses through to international corporations.

Continuous design efforts focused on achieving ultimate 'wearable' comfort and durability, as well as creating productivity gains and delivering significant cost reductions is what positions Pacvac as the world leading manufacturer of backpack vacuum cleaners.

The uniquely designed offset inlet and clear dome lid create a cyclonic effect to help lift the dust from the bottom of the dust bag to maintain maximum airflow

A reusable and easy to clean SMS Hypercone™ dust bag made with quality material ensuring high levels of filtration.

Pacvac's patented snorkel-like Hypercone™ HEPA Rated Filter allows consistent airflow through the machine as the dust bag fills, keeping the motor cooler and maintaining higher levels of suction

Designed for optimal performance, this premium quality motor provides reliability, longevity and ultimate suction power.

Designed together with leading ergonomists, this unique body moulded frame brings the centre of gravity closer to the user to ensure optimal positioning.

The well-padded and easily adjusted straps and harness are made from premium materials, ensuring breathability and ultimate 'wearable' comfort.

PEACE OF MIND

Like any true professional, Pacvac takes great pride in delivering quality products, excellent after sales service and most importantly, peace of mind to our customers.

As the manufacturer, we set ourselves apart by bringing ourselves closer to you. Pacvac's team of dedicated professionals are available to assist with any matter and provide exceptional service and support directly to our customers.

This support is further enhanced by our extensive Authorised Distributor network. From ongoing product advice to fast turnaround time on spare parts and servicing we are confident that our network will provide you with the highest level of service.

Our role is to ensure we deliver excellence in all areas. We are confident that the products, service and support that only Pacvac provides will deliver exactly that.
